SUMMARY

I'm a full-stack developer with 4+ years of professional and freelance experience taking web products end to end — from schema design and REST APIs to polished React frontends and production deploys. I work primarily in React, TypeScript, NestJS, and PostgreSQL, with Firebase and MongoDB in the toolbox when they fit the problem better. I've delivered production work across e-commerce, marketplaces, and internal tooling — comfortable owning a feature solo or contributing inside a team. I care about coherent architecture and code that holds up in production.

EXPERIENCE

Full-Stack Developer | TeamSystem | Tirana | May 2023 - Present

- Built and maintained production web applications end to end using **React**, **TypeScript**, **Node.js**, and **PostgreSQL**, owning features from database schema through API layer to UI.
- Designed backend services following the **CQRS pattern**, separating write commands from read queries to keep complex business logic maintainable and performant under load.
- Developed responsive, accessible UIs in **React + TypeScript**, integrating GraphQL and REST APIs with TanStack Query and managing global state with Redux.
- Collaborated with product and design through code reviews, pairing, and sprint planning — taking features from spec to production deploy.
- Raised unit and integration test coverage to 80%+ with Jest and Testing Library, and hardened GitHub Actions CI to block merges on coverage and test regressions.

PROJECTS

AutoMarket AL — Role-Based Vehicle & Auto Parts Marketplace | 2026 | automarket-al.netlify.app

- **Stack:** React, TypeScript, NestJS, PostgreSQL, Prisma, Redux, TanStack Query, Tailwind CSS
- Built an end-to-end marketplace for cars, motorcycles, and auto parts in Albania, supporting dealer storefronts, individual sellers, and buyers under a single role-based account system.
- Designed and shipped a promotion ranking system that mixes paid placement with recency and relevance, served from a single optimized Prisma query against PostgreSQL.
- Implemented admin moderation tooling for listings, promotion packages, subscriptions, and trusted-seller badges.

Prime Optic — E-commerce Platform for Optical Retailer | 2026 | prime-optic.web.app

- **Stack:** React, TypeScript, Firebase (Auth, Firestore, Hosting), Tailwind CSS, shadcn/ui
- Built a full-stack eyewear store with product catalog, filtering, cart, and order persistence on a serverless Firebase backend.
- Modeled product, cart, and order collections in Firestore with security rules that scope writes to the authenticated owner.
- Implemented Firebase Auth (email/password) and an admin dashboard for product and order management.

EDUCATION

Bachelor's in Information Technology | European University of Tirana | Albania | 2021 - 2024 | 9.6/10 GPA

SKILLS

Frontend: React, Next.js, Redux, shadcn/ui, Tailwind CSS, Material UI, TanStack Query

Backend: NestJS, Node.js, Express, JWT / OAuth, CQRS, Cron Jobs, REST APIs, GraphQL

Databases: PostgreSQL, Prisma, Redis, Firestore, MongoDB

Testing: Jest, Playwright, Postman, Testing Library, Vitest

DevOps & Hosting: CI/CD, Docker, Firebase Hosting, GitHub Actions, Netlify, Vercel

Tools & Practices: Agile / Scrum, Code Review, Git, Git Flow

LANGUAGES

Albanian | Native

English | Fluent

Italian | Basic
